

Sprinkler System Efficiency Checklist

By using efficient irrigation products in your landscape, you are ensuring health growth and minimal water use.

OVERALL

- ✓ Inspect system for leaks, damage and missing components

SPRINKLER HEADS & ROTORS

- ✓ Are in good working condition
- ✓ Placed at proper ground level and straight
- ✓ Properly adjusted - not spraying on unintended areas
- ✓ Nozzle sizes and head spacing provide even coverage
- ✓ Check valves hold water in system while not in use

MICRO IRRIGATION

- ✓ No cut/leaking tubing or missing emitters
- ✓ All emitters appear to be working and with comparable flow

CONTROLLERS

- ✓ Controller is programmed to comply with local ordinances
- ✓ Controller is operating correctly for all areas (manual test)
- ✓ Controller adjusted to seasonal demands
- ✓ Appropriate weather sensor installed
- ✓ Rain sensor inspection
